George Knap

Senior Angular & Nx Engineer | Agentic Engineering | Developer Experience

Location: Czech Rep. / Austria /remote

Mobile: +420777635732
Email: knap.george.at@gmail.com
LinkedIn: george-knap

Senior Angular & Nx Engineer and Developer Experience lead with extensive expertise in architecting high-performance web platforms, large-scale monorepos, and agentic engineering workflows. Recognized for driving modern frontend modernization, optimizing CI pipelines, and delivering robust scalable solutions across international enterprise environments.

Core Skills

Nx, Angular 20+, Signals, TailwindCSS, Material Design, Storybook, RxJS, NgRx, Signal stores, Firebase, Leaflet, Highcharts, Jest / Vitest, Cypress, Eslint, Oxlint, Prettier, Oxfrmt, Nest, Typescript, WebMCP, AI skills, AI agents, SSR, SSG, SSE, SignalR, MercureHub, PWA

Qwik & Qwik City, Qwik Modular Forms, Zod, Valibot

AI: Experienced with Agentic driven development (ADD); Github Copilot; Claude; Antigravity; setting up skills, instructions and MCP servers

BE: NestJS, Express, GraphQL, OpenAPI, Swagger, NodeJS, Bun

To support my work

VSCode, Github copilot / Claude code, GitKraken, Atlassian tools (Jira, Confluence, Bitbucket), Jenkins, Vercel, Slack, Discord, Teams, Zoom, Docker, Groovy, Jenkins, Github/Bitbucket workflows

Agile development methodology

My coding style

```
> declarative instead of imperative code
> pure functions
> correct solutions instead of quick hacks
> well structured components (smart/dumb separation, SOLID principles)
> well tested components with Jest/Vitest; Cypress component testing; Cypress E2E testing
> harnesses for components to be easy-to-use in tests
```

Experience history

2018 - present **Solare Datensysteme GmbH (BKW Energie AG)**

Front End Technical Lead, Angular & Nx Engineer

www.solar-log.com

As a tech lead and architect I'm responsible for designing core implementations of the PV monitoring platform Enerest WEB 4

Built and maintained Angular monitoring modules for a PV platform used by 400k+ users across 140 countries, with a focus on uptime and performance.

Part of my responsibility also lies in leading and mentoring our colleagues to help my team grow. To ensure a smooth developer experience I focus also on optimizing the NX pipeline to bring the performance power of NX into our CI.

```
Stack: Nx22, Angular 21, Material design system, Highcharts, Ag-Grid, Tailwind, Jest/Vitest, Cypress, Storybook
```

Finished projects

11/2024-12/2025 **Entain Services Austria**

Senior Angular Engineer Level III.

https://www.entaingroup.com/

In Entain I was responsible for DX of one of the largest Nx monorepos in the world in the sports betting and online gaming industry.
My biggest achievement was migrating eslint to flat-config format, transforming tooling to ESM, updating code-pushup rules for visualizing eslint KPI statistics, refactoring old code to utilize Nx' affected and caching mechanism.

07/2024-10/2024 **Svihej.cz jumping ropes community portal**

Qwik Front End Developer

https://portal.svihej.cz/

Svihej.cz is a leading jumping ropes e-shop in Czechia. Their community portal promotes a healthy lifestyle and challenges people to learn tricks, earn achievements and share their progress with the community.
My responsibility is to develop an instant-on, fully resumable community portal in Qwik.

`Stack: Qwik, Qwik City, Zod, Valibot`

2021 - 3 month project **Dronetag**

Flutter Developer trainee for fun

https://dronetag.cz/

Czech startup to manage new EU legislation for drone pilots. I had the pleasure to join these young professionals from Czech Technical University to help them build a flutter mobile app, play with drones and learn about Flutter.

`Stack: Dart, Flutter, Material, Cubit`

2021 - 1 month project **Implemented Authentication Server - Artinii**

https://artinii.com/

For Artinii I've implemented an Oauth server with Code Flow + PKCE authentication.
Server is part of the Artinii.com as a single sign-in server. Other domains of Artinii use artinii.com to authenticate. As a single sign-in server, the user shares his token across all domains.

`Stack: Angular, Typescript, angular-oauth2-oidc`

2016 - 2018 **INTENS Corporation**

Location: Prague, Czech Republic

Head of Front End development team & Technical Lead

www.intens.cz

Leading a small team my responsibility is technical design, architecture and development of our Angular web app solutions.
Our products are mostly GIS systems and Crisis management systems for Prague City Council and Police Departments.

`Stack: Angular + Angular Material; AngularJS + Bootstrap; Ag-grid, Leaflet, ArcGIS, ServiceStack, .NET4.6 & .NET Core, MSSQL & ElasticSearch`

2014 - 2015 **Veropath**

Location: Edinburgh, UK

AngularJS Developer

www.veropath.com

At Veropath I was responsible for development of Telecoms Expense Management web app in AngularJS & Typescript. My job was to implement both front end and server side.

`Visual Studio 2015; ASP.NET vNext; AngularJS; C#; RestfulAPI; Insight.Database; MSSQL`

2010 - 2014 **Penzijni spolecnost Ceske pojistovny**

Location: Prague, Czech Republic

C# software developer

www.pfcp.cz/

Implementing and testing new features of the two internal Information Systems. The first created on the Sybase platform - `Sybase PowerBuilder & Sybase ASE database`.
In 2012 a new system was created using `.NET framework 4.5, MS Visual Studio 2010, ReSharper 6.1, TFS source control, WPF, MVVM design pattern, nHibernate, MSSQL`.
I was part of a team responsible for creating user contract modules working full stack on frontend, backend and SQL.

2008 - 2010 **Database developer / Data miner**

4M4 limited company

Development of an information system designed for hotels and restaurants using Sybase ASE databases and Sybase PowerBuilder. T-SQL development.

Education

2006-2010 ***University of Economics in Prague***
Applied Informatics - achieved bachelors university degree
